

JUAL

CABLE FLASHING

PRODUCT DESCRIPTION

JUAL Cable flashing

APPLICATION:

For secure and water tight flashing of roof penetrations for electrical cables on flat roofs with bituminous membranes.

MATERIALS:

Fully welded pipe and assembly ring in acid proof stainless steel AISI 316 / EN 1.4401.

Flange in stainless steel AISI 304/EN 1.4301 for bitumen membrane or foil coated steel flange for foil membrane.

Elbows: *PP or stainless steel AISI 304/EN 1.4301.

Membrane: Bitumen or foil. To be specified at ordering.

*PP material is not UV resistant

Installation and application must be conducted in accordance with current industry standards and compatibility with the roof's membrane must be secured.

TÜVRheinland®
Precisely Right.

This product is tested and certified according to EN 1253.

DELIVERY

JUAL Cable flashings can be delivered with two different elbows. These are not installed upon delivery – which makes it easier to install the cable flashing and pull the cables through it.

Stainless steel elbow

PP elbow

APPROVALS

The cable flashing is approved and certified according to EN 1253 which specifies requirements for construction and function, and manufactured in accordance with DIN 18200, which specifies requirements for serial production.

LGA Certificate no.: 572(year)060 – to be found at www.jual.dk.
